The relative positional accuracy obtained on the points utilized in this survey were less than or equal to 0.02' horizontal at the 95% confidence level. Distances shown hereon are ground distances obtained from grid measurements using a combined scale factor. This plot was calculated for closure and is found to have a minimum plot closure of one foot in 933,600 feet. The field survey was completed on 7/20/2017.
